"You won't find a better trailer for less!"

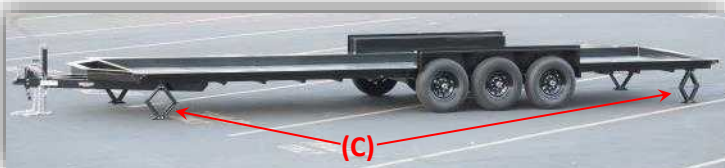

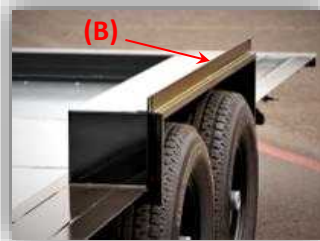

PAD series

Trailer chassis designed exclusively for tiny houses.

Pictured above is a **PAD-14k24** equipped with optional **Galvanized Bottom Pan, Fender Flashing, and Leveling Jacks**

Our PAD series trailers are specifically designed as a foundation for a tiny house. Every detail of the frame is tailored for supporting a tiny house structure and its contents. For example, the crossmember supports are recessed 6" below the top of the frame to accommodate floor insulation without sacrificing floor height. This feature also minimizes contact of steel framework to the subfloor for a significant gain in thermal efficiency. Our PAD series isn't simply a modified flatbed trailer; it's designed from the ground up for one purpose only . . . *to be the ultimate foundation for your tiny house.*

MODEL	LENGTH	AXLES**	GVWR	WEIGHT*	PRICE
PAD-5k10	10 Ft	(1) 5k	5,000	920	\$3440
PAD-7k12	12 Ft	(1) 7k	7,000	1075	\$3760
